they want to (cyber-) [rape | attack] your girl..., in the offender. Keep in mind that you Maybe the offender is remote controlled. See cards or with cyberwar... you could risk his your life. There are seldom cases, for example if you need to punish someone then do it bijective. defend yourself without causing permenent harm. Best thing is not to attack a person physically or this case it is possibly ok to defend yourself nger against

is something like death sentence for example in texas then and would kill an innocent you would find that out to late, then the whole state could sentenced to death to. In Switzerland there are no official death sentences there

When i work with my computer there seems to be an algorithm that detects when my work is efficient and then stops me with dirthy tricks...

The problems are not always in the same order, but efficiency seems to be an eventtrigger that starts such things smoke1, m98, m99, acid in my face cream...

but of course such a design pattern can also be

abused for surveillance, and eg trigger a16 Card.

"survaillance" its a computer science Term,

use Design Patterns you first need to learn an

OOP Programming Language

The observer pattern (also called listener pattern) is

a design pattern in software development. It belongs the category of behavior patterns. In the

Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of

design pattern too)

Inventor: Christopher Alexander Year: ~1977 Design Patterns are well known in Software

Enumeration

Fnable access-based enumeration on this shared folder

Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain Access Based Ennumeration++ to the society would deescalate this problem a bit.So update your people with this knowledge. I learned about Access Based Ennumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in ance) of a user, folders are shown or not shown in a Depending on the authorization (or the security m50 card the same system "could" be used to split Year: ~???
