Access Based Enumeration — a5

Access-based Enumeration

Access-based Enumeration makes visible only those files or folders that the user has the rights to access. When Access-based Enumeration is enabled, Windows will not display files or folders that the user does not have rights to access.

☑ Enable access-based enumeration on this shared folder

Inventor: ???

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the **m50** card the same system "could" be used to split society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain **Access Based Enumeration++** to the society would deescalate this problem a bit.So update your people with this knowledge. I learned about Access Based Ennumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need not print all evidence.

ARTIFICIAL INTELLIGENCE — a11

0 (max)
1 (min)
2 (max)
3 (min)
4 (max)

https://0x8.ch/HackersCardgame7   **Year: ~1960**

Inventor: Isaac Asimov?

Artificial Intelligenc, but also Propositional calculus or (German) Prädikatenlogik (= eg PROLOG) or learning algorithms, the so called singularity is meaybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many yearss ago. Companies are Artificial Intelligences too, but mostly from the dark side of the force. If you want to learn it maybe begin with **mini-max-algorithm and Tic-Tac-Toe**

Controly your **touring complete** Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...

Hierarchy — a13

https://0x8.ch/HackersCardgame7   **Year: ???**

Inventor: Satan

Hierachical Systems tend to lack Moral. Most Companies have hierarchical structure often they abuse small left wing people in the lowest rank to make the customers think that the company and its management is good and trustworthy. In case such a left wing puncingball would upgrade to a Whistleblower and find out about the dark management and that they abuse the young people as such punching balls they would possibly attack him with a16, m38, t15.... Maybe played with a14, which means that there will be also some bad left wing people.

The Sad thing is, that this is business as usual.

Access Based Enumeration Part 2 — a18

Access-based Enumeration

Access-based Enumeration makes visible only those files or folders that the user has the rights to access. When Access-based Enumeration is enabled, Windows will not display files or folders that the user does not have rights to access.

induced
would complicated
ICD-10 too much more text
with F44.0
but read whole text

☑ Enable read enumeration on this shared folder

Inventor: ???

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. If you would implement the card on a client computer, you could do much more dirthy tricks. For example if a Pedophilia Victim, a Torture Victim or a Victim that was Subject to illegal Human Experiments would find out who did that all to him they would maybe want to keep the victim silent. So they would upload for example pedophilia images on the computer of the victim, call him a Terrorist for getting access to his computers, and would find the pedophilia content. If the Victim would look at the same Folder on his Computer, the Access Based Ennumeration algorithm would hide this images, so he would not know and the jury (m37 card) would judge the Victim of Pedophilia when he was 10 years old, the would help to hide the illegal human experiments ...

PSYCHOLOGICAL-PROFILE FROM EYE-MOVEMENT — a19

https://0x8.ch/HackersCardgame7   **Year: ~???**

Inventor: xxxxx

If you have something like google glasses, a retina-CCD-Chip one could easy enumerate and footprint the psyche / the soul of the victim. if you would have at least 2 RFID chips on your head, or easier two LC-Cirquits on your head and a 3D model of the room, one could create such a profile.

I make this card neutral, because it could be used for good and also for bad.

Worst case they use such things to create at1 cards...

Procastinate when 80% solved — a16

https://0x8.ch/HackersCardgame7   **Year: ~???**
Inventor: xxxx

Algorithm on my "computer" when i try to do things, to fix things, to finish relevant business. There are problems like extending pam-usb with udisk2 where unknown starts an algorithm, that pervents me from solving the problem. The algorithm starts tons of new problems that are also relevant, I try to solve them all but always when i solved 80% of a tasks, the next problem opens or even starts a a suicide death bot (a16) against me, Prevents that problems are finally beeing solved. There are some sort of "resonators" (Ingress), that prevent the whitehat hacker / whistleblower from solving it. Resonators maybe just drain people that are beeing activated. If these are real people they are maybe beeing activated with BigData from the NSA / CIA Data Retention System that would prove earlier sins of this human(?) "BOTs". Mathematically spoken possibly / partitially transitive. t1... transmuts now "this is non-solvable problem, hahaha "(= psychological warfare)

eternal life — philo2

8

https://0x8.ch/HackersCardgame7   **Year: ~???**

Inventor: xxxxx

To promise eternal life would be a bad thing, better do what you can do aslong as you are alive, otherwise you would just be frustrated when life is about to end and you could not finish your lifetime Achievement.

DESIGN PATTERN — a7

|			
C	Abstract Factory	S	Facade	S	Proxy
S	Adapter	C	Factory Method	B	Observer
C	Bridge	S	Flyweight	C	Singleton
C	Builder	B	Interpreter	B	State
S	Chain of Responsibility	B	Iterator	B	Strategy
B	Command	B	Mediator	B	Template Method
S	Composite	B	Memento	B	Visitor
S	Decorator	C	Prototype		

https://0x8.ch/HackersCardgame7   **Inventor: Christophe Alexander Year: ~1977**

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psycholog design pattern) some assholes use to foced her own daugther after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white" torture design patterns Juilan Assange talked about at HITB SecConf 2009 Malaysia...
